BUSHMASTER.COM

THE UNITED STATES OF AMERICA WAS FOUNDED ON JULY 4, 1776. NOT BECAUSE ANYONE LET US. BUT BECAUSE FREEDOM COULDN'T BE STIFFLED. AND IT'S AS TRUE TODAY AS IT WAS BACK THEN: LIFE AND LIBERTY DEPEND ON THOSE WITH THE TOOLS AND DETERMINATION TO DEFEND THEM. WE'RE PROUD TO SAY, THERE ARE QUITE A FEW OF US LEFT.

AT BUSHMASTER, IT IS OUR HONOR TO SERVE THE BACKBONE OF THIS NATION WITH PROVEN, AMERICAN-BUILT MODERN SPORTING RIFLES THAT PROTECT OUR WAY OF LIFE. FOR THE GENERATIONS BEFORE US THAT FOUGHT TO PAVE THE WAY. FOR DUTY. FOR HONOR. FOR 40 YEARS AND COUNTLESS MORE TO COME. FOR THE FREE.

HISTORY

In the hands of those who defend American freedom in all its forms — and in every high performance firearm and component we proudly manufacture — the same fiercely independent spirit of innovation that began more than 38 years ago continues to advance the Bushmaster name, and way of life.

The same trusted name you'll find on rifles in the hands of law enforcement organizations, military units in more than 50 countries, and countless competitors, hunters and recreational shooters who have made Bushmaster the American standard.

In 2014, Bushmaster moved to Huntsville, Alabama. Utilizing improved engineering, manufacturing techniques and advanced materials, we continue to advance the ever-versatile MSR platform. Today, Bushmaster extends America's most trusted MSRs to new levels of adaptability and performance with its all-new line of compact pistols and lightweight, big-bore 450 Bushmaster SD Carbines and ACR.

Steadfast and stronger than ever, the number one name in MSRs proudly serves from sea to shining sea, where our freedom and the right to protect it will never be taken for granted.

This year, we're broadening our lineup of ACR's for even more hunting and special-purpose applications. Our new, 450 big-bore carbines, 6.8mm Remington SPC, and compact pistols makes the ACR the most adaptable platforms yet.

ACR 6.8MM REMINGTON SPC 90955

Increase downrange stopping power with the all-new ACR 6.8mm Remington SPC. Ideal for medium to large game, and for tactical applications.

ACR 450 BUSHMASTER 16" / 18.5"
91060 & 91070

The new ACR rifle adds tremendous 'thump' as only the 450 Bushmaster cartridge can deliver. Perfect for lighting-fast follow-ups on thick-skinned game.

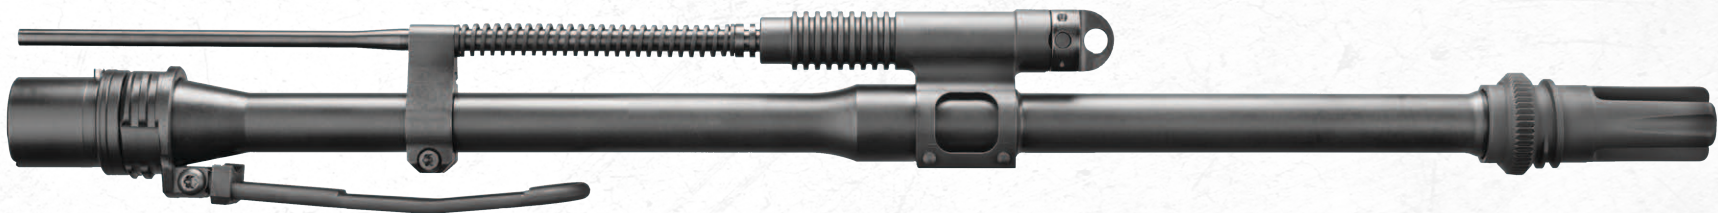

ACR PISTOL 90036

The shortest & most maneuverable member of the ACR series

NEW
PRODUCTS
FOR 2019

450 BUSHMASTER 16.5" & 18.5"

6.8MM REMINGTON SPC 16.5"

ACR BARRELS

New for 2019, drop-in barreled assemblies in two new chamberings: 6.8mm Remington SPC for improved stopping power; and 450 Bushmaster, delivering big-bore knockdowns, ideal for thick-skinned game like feral hogs.

*Please see page 74 for chambering and caliber details.

FIRE

A close-up photograph of a wooden surface, likely a piece of lumber, showing a prominent knot and the grain of the wood. A metal rod or pipe is visible, running diagonally across the frame. The lighting is dramatic, highlighting the textures of the wood and metal.

CHANGES EVERYTHING.**

RAPID, TOOL-LESS TAKE DOWN

With new interchangeable ACR barrel assemblies in 6.8 mm Remington SPC, 5.56 NATO and 450 Bushmaster, the possibilities and the number of applications you can pursue with one MSR are endless. Change calibers and barrels with tool-less rapid takedown in the field. With the most adaptable, accurate and reliable MSR platform ever invented. Only from Bushmaster.

BARRELS & CALIBERS

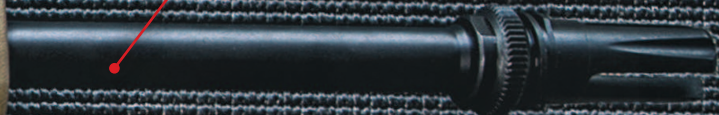

FNC-TREATED 4150 CMV BARRELS
AVAILABLE IN 5.56 NATO IN THE
FOLLOWING BARREL LENGTHS
(10.5", 14.5", 16.5" AND 18.5")
6.8MM REMINGTON SPC (16.5")
450 BUSHMASTER (16.5", 18.5").

NEW

6.8MM REMINGTON SPC BARREL

NEW 6.8 MM REM SPC BARREL ASSEMBLY, FOR INCREASED ENERGY AND DOWNRANGE PERFORMANCE.

NEW

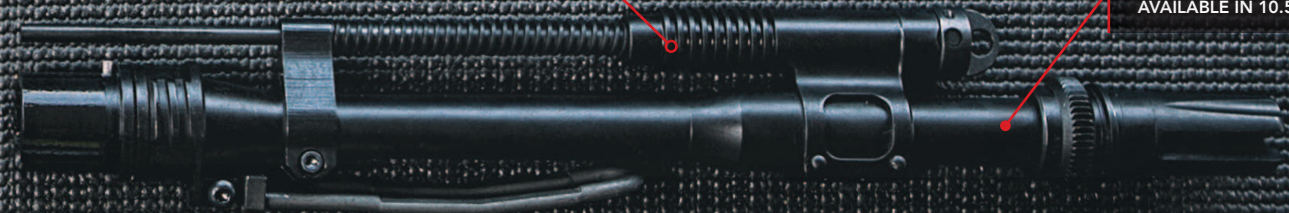

450 BUSHMASTER

NOW AVAILABLE IN 450 BUSHMASTER, FOR BIG-BORE KNOCKDOWN POWER.

GAS PISTON

ADJUSTABLE 2-POSITION GAS PISTON FOR INCREASED RELIABILITY AND SILENCER ADAPTABILITY.

5.56 NATO BARREL

AVAILABLE IN 10.5", 14.5", 16.5" AND 18.5"

FLASH HIDER

51T AAC FLASH HIDER COMES STANDARD ON 5.56 NATO AND 6.8MM REMINGTON SPC

ACR RIFLE SERIES

FAST TO ADAPT. FIERCELY RELIABLE.

FIRE CONTROL

AMBIDEXTROUS CONTROLS DELIVER IMPROVED ECONOMY OF MOVEMENT FOR LEFT AND RIGHT-HAND SHOOTERS.

(NOTE: Geissele trigger available in ACR DMR Model only)

STOCKS

TELESCOPING STOCKS WITH ADJUSTABLE LENGTH OF PULL, AVAILABLE IN FOLDING OR STRAIGHT VERSIONS.

MAGPUL PRS2 STOCK

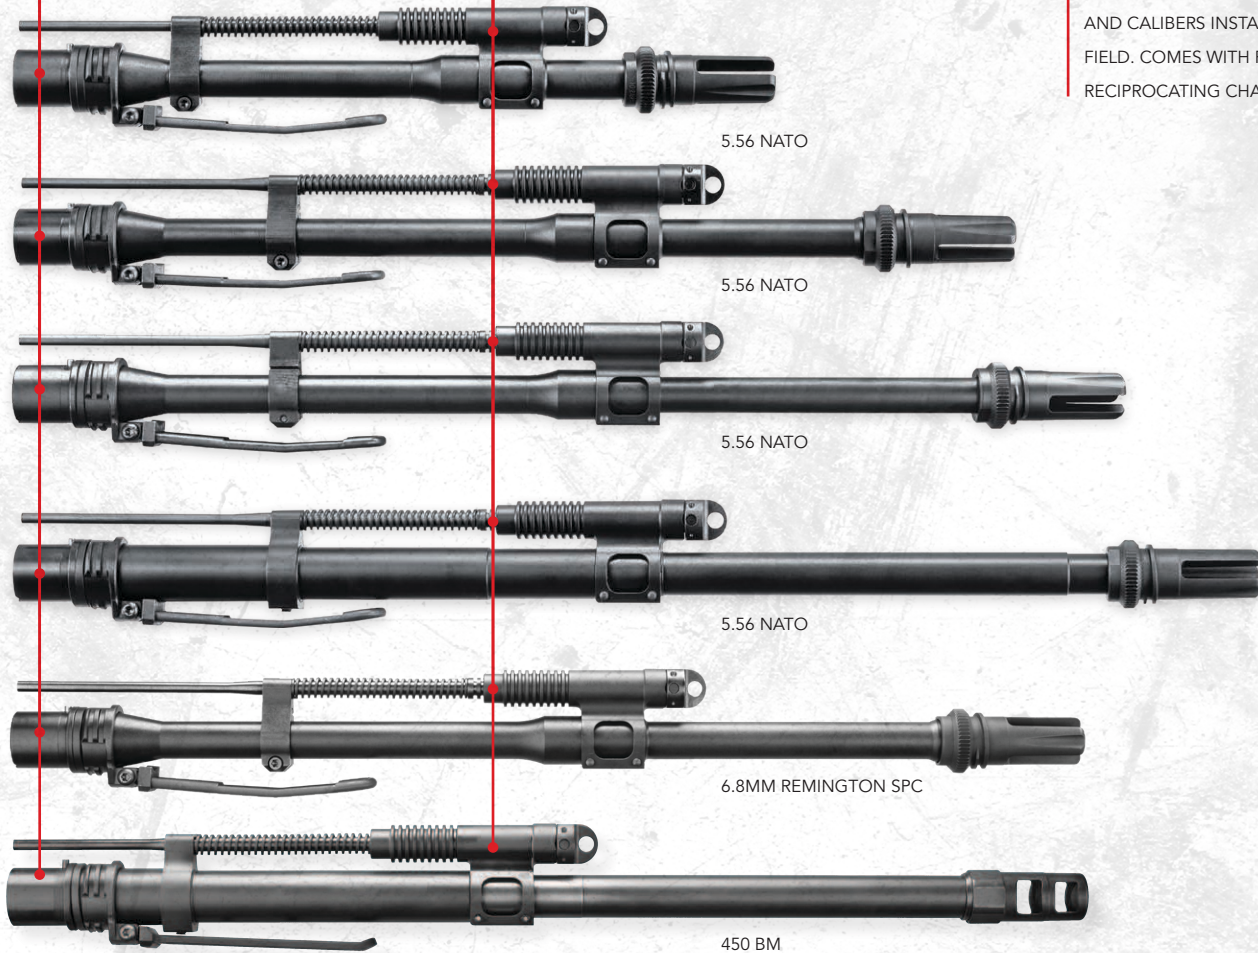

HANDGUARDS

POLY HANDGUARD, OR THREE-RAIL ALUMINUM HANDGUARD, FOR ADDED MODULARITY AND ADAPTABILITY.

BARRELS

HAMMER-FORGED, 4150 MELONITE (FNC) TREATED BARRELS AVAILABLE IN 10.5", 14.5", 16" AND 18.5" LENGTHS.

GAS PISTON

ADJUSTABLE 2-POSITION GAS PISTON SYSTEM – INCREASED SILENCER ADAPTABILITY.

RECEIVER

PROPRIETARY MODULAR SYSTEM ALLOWS USERS TO CHANGE BARRELS AND CALIBERS INSTANTLY IN THE FIELD. COMES WITH REVERSIBLE, NON-RECIPROCATING CHARGING HANDLE.

FLASH HIDER

AAC BLACKOUT SILENCER ADAPTER / FLASH HIDER.

ACR RIFLE SERIES

91060 (16.5") & 91070 (18.5")

NEW ACR 450 BUSHMASTER 16" / 18.5"

- New 450 Bushmaster caliber, delivers ultimate stopping power for medium to large game
- AAC SquareDrop modular handguard, Key-Mod compatible
- 7-Position collapsing and folding stock, adjustable for LOP and cheek rise
- Fully ambidextrous controls with full-time ambidextrous charging handle
- New 450 caliber muzzle brake, for improved recoil reduction

90945

ACR SBR

- NFA- restricted 10.5" Short-Barreled Rifle configuration
- Picatinny Quadrail handguard system, accepts numerous accessories
- Fully ambidextrous controls with full-time ambidextrous charging handle
- 7-position collapsing and folding stock accepts QD sling attachments
- Advanced Armament Blackout flash hider, for muzzle flash suppression and rapid attachment of AAC silencers

90036

NEW ACR PISTOL

- New compact pistol configuration
- AAC SquareDrop modular handguard, Key-Mod compatible
- Quick-Detach sling mount receiver end plate, accepts QD sling attachments
- Fully ambidextrous controls with full-time ambidextrous charging handle
- Advanced Armament Blackout flash hider, for muzzle flash suppression and rapid attachment of AAC silencers

*Please see page 74 for chambering and caliber details.

90955

NEW ACR 6.8MM REMINGTON SPC

- New 6.8mm Rem SPC caliber, for increased energy and performance
- AAC SquareDrop modular handguard, Key-Mod compatible
- 7-Position collapsing and folding stock, adjustable for LOP and cheek rise
- Fully ambidextrous controls with full-time ambidextrous charging handle
- Advanced Armament Blackout flash hider, for muzzle flash suppression and rapid attachment of AAC silencers

*Please see page 74 for chambering and caliber details.

BUSHMASTER ACR DMR

By Richard Schutz

GUN WORLD

Featured in
Gun World
Vol. 58 NO.8

Reintroduced at the 2017 SHOT Show, the ACR DMR brings a new level of precision and adaptability to the ACR line. In addition to those features found on the Basic and Enhanced ACR models, the DMR version adds a fixed Magpul PRS-2 buttstock, a quick-change, 18.5-inch barrel and an aluminum handguard with 1913 MIL-SPEC rails on three sides.

OPERATION AND SPECIFICATIONS

The Bushmaster ACR DMR utilizes a regulated short-stroke, gas-operated piston system to operate the bolt carrier group (BCG). This system keeps hot gases and fouling material from entering the receiver and BCG. The gas regulator allows the operator to set the system for either suppressed ("S") or unsuppressed ("U") operation with a simple twist of the selector.

It is not necessary to remove the barrel for cleaning. However, if you want to do so, or if you want to install a different barrel, it requires only five easy steps: After locking the BCG to the rear and removing the handguard, simply lower the barrel locking lever, rotate it approximately one-quarter turn counterclockwise until it stops, and then pull the barrel assembly forward out of the trunnion. It couldn't be any easier (unless someone does this for you).

Removing the gas piston for cleaning is easily accomplished in only three steps and can be done with the barrel attached or removed from the upper receiver.

The composite polymer lower receiver has a fixed Magpul-style pistol grip with a slide-out compartment designed to store two CR123 batteries. A Geissele two-stage trigger provides a smooth-as-silk trigger pull, which breaks cleanly at an average of 4 pounds, 5.6 oz, for 10 consecutive pulls (as measured by a Lyman digital trigger pull gauge).

To accommodate both left- and right-handed shooters, the magazine release, bolt lock and safety selector are all ambidextrous. The magazine release operates with a pushbutton on either side of the receiver. The bolt release is different from an AR-15 in that it is located low, in front of the trigger guard. Pushing it up locks the bolt back; pushing it down releases the bolt. This can easily be operated using one's trigger finger. The selector switch (safety) is located in the same position as on an AR-15 and works in the same manner.

The ACR DMR comes with the Magpul PRS-2, which is an excellent buttstock. It's adjustable for length of pull and has an adjustable cheekpiece.

"THE ABILITY TO CHANGE THE BARREL IN LESS THAN TWO MINUTES WITHOUT TOOLS AND WITH A SOLID LOCKUP IS PROBABLY THIS RIFLE'S BIGGEST ASSET."

DESIGNATED LEADER OF ADAPTABILITY.

The Remington 69-grain Sierra MatchKing BTHP load turned in the best average for three five-shot groups: 1.17 inches. Hornady Black 62-grain FMJ was a close second at 1.34 Inches. Federal Premium 69-grain Sierra MatchKing BTHP load came in third at 1.79 inches. The smallest individual group was from the Hornady Black 62-grain FMJ at .91 inch. The top two loads produced approximately 1.25-inch averages for three five-shot groups—quite acceptable for a rifle of this type. All seven loads were less than 2 inches for three five-shot groups.

YOU CAN HAVE BOTH

The modularity and ambidextrous operation of the ACR DMR are what really set it apart from most AR-15 style rifles. The ability to change the barrel in less than two minutes without tools and with a solid lockup is probably this rifle's biggest asset. Add to that the ability to change the buttstock and handguard quickly and without tools, and you have something that few other rifles can match.

The ACR DMR fills a special niche in the AR-15-type rifle market. It is not as light and handy as many AR-15s, but it has much greater potential for sustained long-range accuracy than the lighter, quicker-handling AR-15s. Its excellent trigger, ambidextrous controls, ergonomics and excellent stock help offset some of its weight and length. That said, it is lighter and more maneuverable than most 7.62x51 (.308 Win.) AR-10-style rifles—especially when considering the weight of ammunition.

ACR DMR DESIGNATED MARKSMAN RIFLE 90958

The ACR DMR brings a new level of precision and adaptability to the ACR platform. Its 18.5" hammer-forged, stainless, Melonite (FNC) treated barrel, with 51T AAC® flash hider delivers increased accuracy and durability. With its adjustable, two-position gas-piston operating system, Magpul® PRS2 stock and Geissele® trigger, it's the most accurate configuration of the Adaptive Combat Rifle ever devised. And like all Bushmaster ACRs, fully ambidextrous controls are positioned for fast manipulation and ease of use.

- 5.56 NATO
- Magazine: 20-Round PMAG
- Barrel length: 18.5"
- Rifling Twist Rate: 1:7
- Overall length: 39"
- Upper Receiver: ACR Multi Caliber
- Barrel Material: 4150 hammer-forged
- Barrel Finish: FNC Melonite
- Barrel Contour: Heavy

BACK TO BASICS

By Brian McCombie Featured in Gun Digest Volume 34 Issue 10 - July 2017

The Bushmaster Minimalist returns to the origins of the AR design, offering a lightweight and nimble multipurpose rifle.

In the past several years, there has been a noticeable shift in how some AR platform rifles are being made. The shift is, in a sense, "back," as in, back to an original concept. The AR, after all, was designed to be a lighter rifle. That might seem like a radical idea, given that I've hefted AR-15s, which were all of 9 pounds, unloaded, and AR-10s that could have doubled as free weights for arm curls.

Yet, as designed over 50 years ago by Eugene Stoner, the AR platform was supposed to be a light and nimble rifle, easy to carry and quick to deploy. And those design parameters are what gun manufacturers like Bushmaster are getting back to — in Bushmaster's case with the recent debut of its new Minimalist-SD chambered in 5.56mm and 300 AAC Blackout (BLK).

AT THE RANGE

For my accuracy testing, I used three types of .300 BLK ammunition: Barnes' VOR-TX with a 120-grain TAC-TX bullet; Dynamic Research Technologies' 135-grain hollow-point; and SIG Sauer's Elite Performance load with the 120-grain HT bullet.

My best overall five-shot group was with the Barnes VOR-TX ammunition, and it measured .958 inch. Overall, the Barnes also scored the tightest average groups, too, at just under 1.20 inches. The other two ammo brands punched in many five-shot groups at well under 2 inches, including a 1.12-inch group from the DRT and a 1.34-incher from the SIG Elite.

The Minimalist employs a direct-impingement gas system. And it functions just fine. I shot off well in excess of 400

rounds of ammunition through my Minimalist and didn't have a single jam up or even one extraction problem. The empty brass kicked out nicely, ending up at a consistent 5 feet or so from my shooting position.

THE MINIMALIST AFIELD

Unfortunately, the hunt I did with the Minimalist didn't go as hoped. The Nevada coyotes we were after either did not get the memo to show up — or they received the memo and figured they were better off elsewhere! What I can say about the rifle was that it was a joy to carry on the many, many sets we did, in terrain that varied from sagebrush flats to steep foothills to muddy trails.

LEANER AND MEANER

So, how did Bushmaster achieve this lightweight package, with the Minimalist-SD in 300 BLK coming in at 6 pounds, 3 ounces, and the 5.56 model at an even 6 pounds?

"The main weight savings are in the pencil-weight barrel on the 5.56," said Adam Ballard, Bushmaster's Senior Product Manager for Modern Sporting Rifles. "Obviously, the 300 BLK model needed a thicker barrel. But it also has a larger bore, so it's only slightly heavier, adding just three ounces to the rifle." Another area where weight was pared off was the SquareDrop handguard.

Even with trimming out a good deal of weight, Bushmaster still managed to deliver many features that might be considered upgrades on other AR's, including a Melonite finish, an AAC 51T Blackout fast-attach silencer

mount and a lightweight Mission First Tactical Grip and 30-round magazine. The 16-inch barrel is made from chrome-moly steel and is FNC treated to stand up to hard use in most field environments.

“THE MINIMALIST-SD RUNS GREAT WITH A SILENCER, TOO,” BALLARD SAID, “AND THE RIFLE’S LIGHTWEIGHT PROFILE MAKES SILENCER USE NOT OVERLY TIRING.”

Bushmaster decided to produce the 300 BLK models first, so that was what I received. But in April of this year, Bushmaster also began producing the 5.56 version of the rifle and shipping it to dealers. Both rifles have the same suggested retail prices. I'm not sure if that will hold up for prices paid in-store and across the Internet; one caliber might become more popular than the other, altering the price structure. What I am sure about is that buyers will get light-weight and very functional rifles able to handle most shooting scenarios, in most shooting environments.

BUSHMASTER

BA50

50 BMG

45

BUSHMASTER BA50

From its match-grade chamber out, the BA50 is built to shatter all previous expectations for long-range accuracy. A free-floated barrel, with 1:15" twist and 8-groove rifling is perfectly suited for harnessing sub-MOA accuracy from the 50 BMG. And its left-hand operated, right-hand eject bolt-action and 10-round box magazine, ensure comfortable cycling with no need for the shooter to adjust position.

The BA50 is also one of the simplest 50 caliber rifles to assemble and maintain. Its upper receiver locks to the lower receiver with two integral pins, befitting the nation's leading MSR manufacturer. Its full-length Picatinny rail accommodates a wide range of optics. And an Advanced Armament Corp Cyclops brake drastically reduces recoil, and allows for fast attachment of an AAC Cyclops silencer.

AAC CYCLOPS

Specially developed to tame the 50 BMG cartridge, the Cyclops suppressor significantly reduces the felt recoil and overall sound signature of the BA50. Specially heat-treated alloys and CNC-fusion welding yield a structure more than capable of withstanding intense 50 BMG pressures. Its unique thread and spring-biased secondary latch couples to the proprietary muzzle break in less than 10 seconds.

For additional information on purchasing a silencer please visit: www.advanced-armament.com

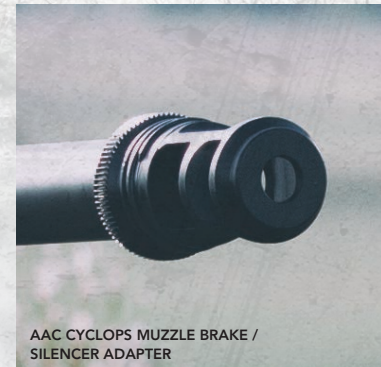

50-CALIBER

FORCE MULTIPLIER.

AAC CYCLOPS

ENGINEERED TO DRAMATICALLY REDUCE THE SOUND, RECOIL AND FLASH SIGNATURE OF THE 50 BMG CARTRIDGE AND BUILT TO WITHSTAND ITS MASSIVE PRESSURES WITH NO LOSS OF DOWNRANGE POWER OR ACCURACY.

BUSHMASTER BA50 90827

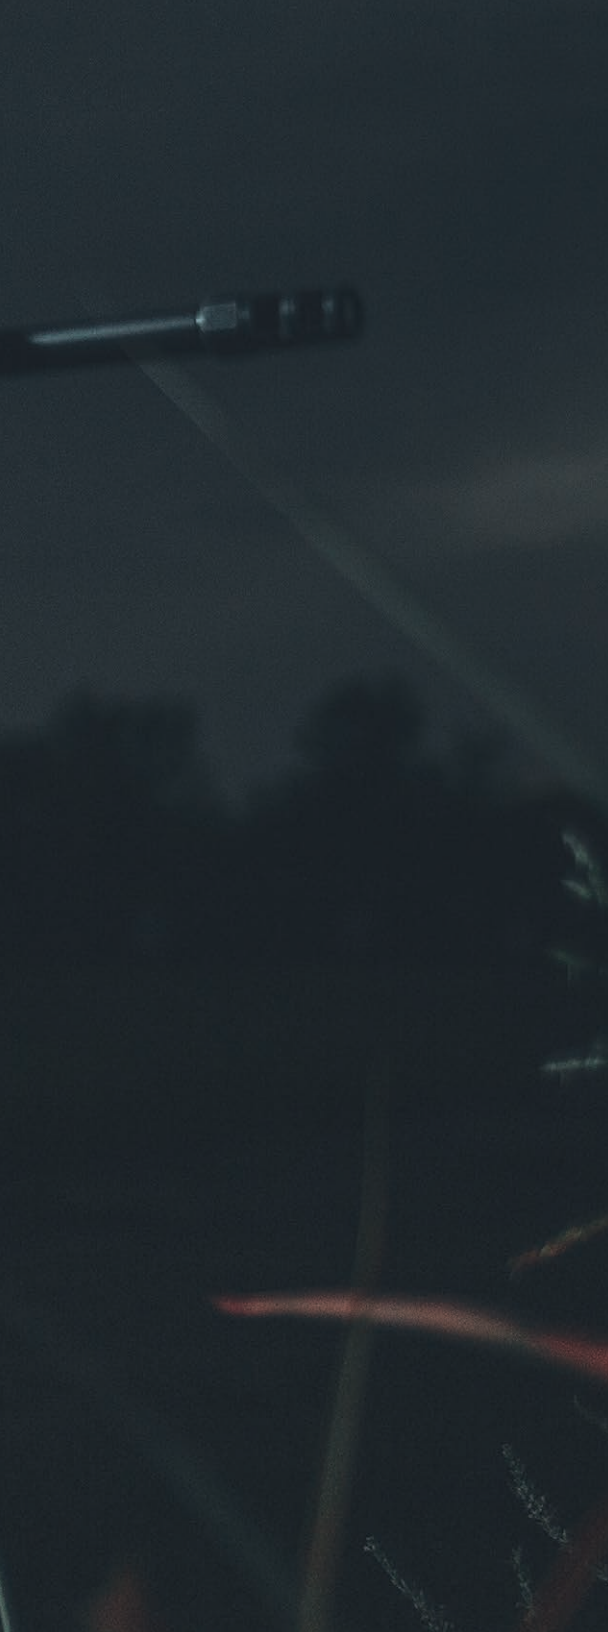

- 50 BMG
- 30" barrel with 1:15" twist
- Barrel free-floated within vented fore-end
- Bolt action: left bolt / right port, for faster cycling of action
- Magpul PRS adjustable buttstock with LimbSaver recoil pad
- Equipped with AAC Cyclops muzzle brake spaces/ silencer adapter, design for optimal recoil reduction and able to accept AAC Cyclops .50 cal. silencer
- Disassembles like an AR-type rifle for cleaning and maintenance
- MIL-STD 1913 rail on receiver and vented fore-end
- Lower receiver machined from T6-6061 aluminum billet
- Steel bipod with folding legs
- ErgoGrip Deluxe Tactical pistol grip
- Manganese phosphate finish on steel parts
- Hard anodized black finish on aluminum parts (Mil-Spec)
- Ships with Pelican™ Storm deployment case, two 10-round magazines, and eye and ear protection

THE ULTIMATE

**HUNTING
ADVANTAGE.**

HUNTING

Hunting rifles are tailored to meet the specific needs of each application. However, the MSR offers unlimited configuration possibilities with the same rifle. Upper receivers with different chamberings and barrels can be field changed in minutes. Handguards, pistol grips and rear stocks can be adapted for hunting everything from varmints, to deer, to feral hogs.

The MSR also offers several inherent advantages to hunters no matter their pursuit. The gas-operated system significantly reduces felt recoil, for quicker target acquisition and more precise follow-up shots. The platform is more compact than most and depending on the application, can be lighter as well. Optics and an endless variety of purpose-specific accessories can easily be mounted to the receiver and handguard.

Last, but certainly not least, the MSR platform's proven reliability in every environment and scenario makes it the ideal hunting tool. In any configuration, for any pursuit, each Bushmaster MSR is a workhorse you can trust at the moment of truth.

UPPER ASSEMBLIES

UP YOUR MSR GAME WITH PERFORMANCE ENHANCING EXTRAS.

- Built on the versatile Bushmaster modular MSR upper platform
- Barreled upper receivers can be used on existing MSR-type lower receivers
- Bushmaster 4150 chrome-moly-vanadium steel barrels feature hard-chrome lining in both bore and chamber for extended barrel life
- All receivers feature integral brass deflectors and hard anodized finish
- Each assembly is factory headspaced, proofed, test fired and ready to use

*All NFA rules apply. Please see page 74 for chambering and caliber details.

XM-15 5.56 NATO MINIMALIST-SD

A 16" barrel, A3 flat top upper, lightweight gas block, free-floated rifle length SquareDrop handguard, AAC Blackout flash hider.

90025 \$799

XM-15 300 BLK MINIMALIST-SD

A 16" FNC treated 4150 lightweight barrel, A3 flat top upper, lightweight gas block, free-floated rifle length SquareDrop handguard, AAC Blackout flash hider.

90026 \$799

XM-15 300 BLK ORC

A 16" lightweight 4150 FNC barrel, rifle-length aluminum free-floated handguard, A3 flat top upper, AAC Blackout flash hider.

90027 \$599

XM-15 5.56 NATO PISTOL FLAT TOP WITH CARRY HANDLE

A 11.5" barrel, A3 flat top upper with detachable carry handle, GI handguard, A2 flash hider.

91954 \$699

16" 450 BUSHMASTER

Add the hard-hitting punch of the 450 Bushmaster to your Bushmaster lower receiver instantly. AR-type gas operating system drastically reduces recoil for excellent second shot control. Aluminum forearm free-floats the barrel for optimum accuracy. Heavy barrel is hard chrome-lined in bore and chamber for exceptional durability and enhanced features. 1:24" twist rifling, optimized for the .450 bullet. Includes 5-round 450 specific magazine.

91700 \$699

20" 450 BUSHMASTER

Add the hard-hitting punch of the 450 Bushmaster to your Bushmaster lower receiver instantly. AR-type gas operating system drastically reduces recoil for excellent second shot control. Aluminum forearm free-floats the barrel for optimum accuracy. Heavy barrel is hard chrome-lined in bore and chamber for exceptional durability and enhanced features. 1:24" twist rifling, optimized for the 450 bullet. Includes 5-round 450 specific magazine.

91702 \$699

16" PATROLMAN'S CARBINE (M4 A3)

A 16" M4 profile barrel, A3 flat top upper with detachable carry handle, G1 handguard, A2 flash hider, A2 front sight post with bayonet lug.

91822 \$599

16" FLAT TOP

A 16" M4 profile barrel, A3 flat top upper, G1 handguard, A2 flash hider, A2 front sight post with bayonet lug.

91823 \$539

16" OPTICS READY CARBINE

A 16" M4 profile barrel, A3 flat top upper with optics mounting risers, G1 handguard A2 flash hider, gas block with bayonet lug.

92194 \$599

20" PREDATOR (223 CALIBER)

Vented, free-floating fore-end and scope risers on an A3 flat top upper, 11° competition muzzle crown and milled gas block, fluted, extra heavy, non-chrome-lined 20" barrel with 1:8" twist.

20" 92450 \$739

24" VARMINTER (223 CALIBER)

Vented, free-floating fore-end and scope risers on an A3 flat top upper, 11° competition muzzle crown and milled gas block, fluted, extra heavy, non-chrome-lined 24" barrel with 1:9" twist.

24" 92820 \$699

300 AAC BLACKOUT

A 16" M4 profile barrel, A3 flat top upper, quad rail rifle length, free-float handguard, AAC Blackout flash hider.

92866 \$709

LOWER ASSEMBLIES, RECEIVERS & PARTS

SIX-POSITION TELESCOPING STOCK AND PISTOL GRIP

Assembled lower receiver with all Bushmaster components, marked for multi-caliber.

ADDITIONAL PARTS

ENHANCED PISTOL GRIP

- Offers upgraded ergonomics to OEM grip
- Textured for sure-grip in all conditions
- Made of durable military grade polymer
- Will fit all M16, AR15, M4 and HK416 variants made to Mil-Spec
- Secure watertight storage compartment
- Foam storage block to reduce noise

93392 \$24

SINGLE POINT BUNGEE SLING

- Metal carabiner clasp with nylon sleeve to reduce noise
- Bungee strap for flex and ease of use
- Will fit a wide variety of mounting hardware
- Perfect when coupled with the OPSM sling mount

93394 \$49

SHORT VERTICAL FORWARD GRIP

- Aids in faster target acquisition
- Reduces shooter fatigue
- Textured for sure-grip
- Will fit all M16, AR 15, M4 and HK416 variants made to Mil-Spec
- Internal storage with fitted foam to eliminate rattle or noise
- Mounts to any standard 1913 rail

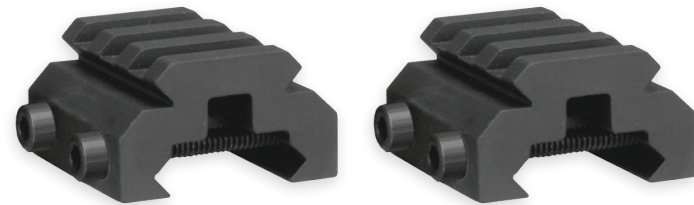

93390 \$24

SINGLE POINT SLING MOUNT

- Single-point sling mount for snap clips, carabiners, or conventional slings up to 1.25" in width
- Unlike the competitors, no tube disassembly necessary, simply pull off buttstock and install
- CNC machined from aircraft grade aluminum with black matte finish

93398 \$39

B.M.A.S. MINI SCOPE RISERS (1/2" RISER)

Mini risers mount to a picatinny rail to elevate the scope for use with standard height scope rings

Some Bushmaster firearm barrels are marked with the military caliber designation for the chamber of the barrel, including 7.62 x 51 and 5.56 x 45. In these firearms, the following cartridge interchangeability is acceptable:

IN BARRELS MARKED	THE FOLLOWING AMMUNITION MAY ALSO BE SAFELY USED
5.56 x 45	223 Remington (223 REM)
223 Remington (223 REM)	NONE
7.52 x 51	308 Winchester (308 WIN)
308 Winchester (308 WIN)	7.62 x 51

WARNING! NEVER fire 5.56 x 45 (also known as 5.56mm NATO or 5.56mm Military) ammunition in a barrel marked "223 Remington" or "223 REM". Excessive pressure can result and cause property damage, personal injury and/or death.

WARNING! As military ammunition does not have a headstamp indicating the caliber, it is the responsibility of the user to determine the caliber of the ammunition before use. Using improper ammunition may cause property damage, personal injury and/or death.

IMPORTANT RETURNS AND REPAIRS NEW POLICY MESSAGE

To provide enhanced repair and return services we are now requiring that consumers contact our customer service team at 800-883-6229 to obtain a Service Request Number (SRN) prior to shipping product to the Company or Authorized Service Center. This will allow for improved tracking of return and ensure all consumers benefit from a faster and more reliable process. **No return will be accepted without an SRN on the shipping label.** Packages sent without the required SRN will not be accepted and marked Return to Sender. We appreciate your cooperation and look forward to improving this process.
