# AutoLock X3 HG Batons

The Monadnock® AutoLock® X3™ HG incorporates improvements found in the AutoLock X3™ series of batons, along with larger diameter shafts for those who prefer a baton with a stouter feel. Some of the features found in the X3 HG are an integrated nose guide for more efficient holstering and grip protection, improved positive locking design for reliability, a more stable feel with tightened tolerances and a corrosion-resistant finish and components. See our website for more information.

# AutoLock X3 Batons

The Monadnock® AutoLock® X3™ expandable baton improves its original positive locking design with notable improvements which include an updated cam and stainless steel ball bearing design which offers reliably consistent locking action. A more solid feel in the hand when performing or demonstrating techniques and a new smooth plastic nose on the baton handle for more efficient holstering and transition from the holster to the hand. New blackened electroless nickel finish improves corrosion resistance on the inside and outside of the baton. See our website for more information.

## HINDI BATON CAP™

- Offers enhanced baton retention and maximum striking power during physical altercations while being safer to the suspect without limiting the use of force

## WEDGE™ BATON CAP

- This tapered design offers a natural grip for maximum baton retention while in the field or performing techniques in a training environment

## BATON TIP, GRIP & FINISH OPTIONS

Monadnock batons feature a wide variety of grips, tips and finishes to allow you to choose the tool that best fits your duty requirements.

### TIPS

**Standard Steel Tip**  
Allows for opening the baton in a high-profile manner; may gain psychological advantage for officer over subject.

**Safety Tip®**  
Reduces sharp edges; urethane covering allows passive drawing of the baton.

**Power Safety Tip®**  
Engineered to put more weight forward to better balance the baton in the hand and improve kinetic energy transfer at the moment of impact. The larger tip surface may turn a subject's pockets inside out, reducing the risk of getting stuck with sharp objects.

**3xT Tactical Training Targeting Tip**  
Featuring the *Power Safety Tip* that helps criminal justice professionals improve their striking skill because they can clearly see the track of the baton's tip during demonstrations, practice and/or in the street. Lime green only.

### GRIPS

**Foam Grip**  
Offers the highest tear strength and allows quick access from the Front Draw® Holder.

**Super Grip®**  
The fluted surface texture provides excellent baton retention in and out of the holder.

**Knurled Grip**  
The knurled grip enhances baton retention while performing strikes, blocks or jabbing techniques.

**Grenade Grip**  
Offers a ridged handle design for a sure grip.

## TAKE CONTROL. AND KEEP IT.

Hiatt® handcuffs offer a variety of unique features designed to address the needs of today's law enforcement personnel. Our fast back-loading application allows an open cuff to be snapped back into place with a quick motion of the wrist and then reapplied without having to release the offender's hand. With 18 teeth, 3 independent retaining bars with 6 teeth on each, we make it extremely difficult to pick, while providing increased strength as the shackle engages the additional teeth. Finally, True Swing Technology ensures the swing arm is balanced and centered so it locks into the center of the shackle every time.

### 2010HD DOUBLE KEY HOLE CHAIN STYLE

Crafted from heavy-duty high carbon steel with reinforced steel swivels. Double key hole handcuffs make removing Hiatt handcuffs much easier. With key holes on both sides of the cuff, there is always one facing up for ease of access.
